

Live Event: Webinar (Oct 22, 2015 @11:00AM ET)
**Introduction to all new TI Sitara™ AM57x Processors
& Ittiam's Clove Solutions**

This webinar starts with an introduction to the all new **TI Sitara™ AM57x processors**, including features, target applications and benefits. This will be followed by an introduction to **Ittiam's** offerings on AM57x for industrial applications. Ittiam's AM57x-based solutions are marketed under the brand name of **Clove** and include hardware boards, Media SDKs and Pre-configured Systems to realize use cases such as audio video encoder/decoder, low latency video streaming, digital video recording and more. These solutions are ideal for power-sensitive applications in industrial automation, surveillance, medical, enterprise, aerospace and defense. The webinar will provide an insight into the technical capabilities and solution specifications of Clove. A quick walk through on procurement, support and licensing models will conclude the webinar.
