

Clove is Ittiam's compact **low-power, versatile video platform** designed with Texas Instrument's recently announced Sitara™ AM57x processors. Clove's single/dual ARM Cortex™-A15 and C66x™ DSP(s) enable **Full-HD H.264** encode/decode, **H.265/HEVC decode**, high-fidelity audio and low-latency video streaming with as low as **50 msec glass-to-glass latency**. With the capability to support **2D/3D graphics & machine vision** algorithms, Clove is perfect for intelligent visualization and control systems.

Clove **hardware** is available in industrial and commercial temperature ranges. System solutions on Clove include **adroitSDKs** (Media SDKs for industrial video systems) and **Pre-configured Systems** (Clove hardware bundled with System Software for pre-defined multimedia use-cases, such as Video Encoder/Server, Video Decoder/Player, Digital Video Recorder, Transcoder and Video Mixer/Switcher).

Visit www.ittiam.com/clove to know more about these solutions.

7 Highlights That Make Clove the Perfect Solution for Low-Power Industrial Video
